

# English Green

*Progressive thinking for  
Ecology & Nation*

**ENGLISH GREEN** is a new pro-Ecology, pro-Nation campaign movement. Though we will work beside other green campaign groups where there are threats to the environment, **ENGLISH GREEN** is proud to be different.

Whilst some other green campaigners adhere to political correctness and fear to tread near sensitive subjects such as population and the damage uncaring sections of the traveller community create, **ENGLISH GREEN** will speak out as a voice for ecology.

From threats to allotment sites to the high speed rail link, roads through open countryside destroying wildlife habitats to large scale housing developments, airport expansions to animal welfare **ENGLISH GREEN** shall speak out.

**What is best for the environment & what is best for England – Our voice shall be heard!**

**Come and join us**
